- ◆ Multiple Levels of Conflict Handling
- ◆ Color Coded Appointment Types
- ◆ Resource Based (Unlimited Resources)
- ◆ SuperBills (Encounter Forms/Charge Slips)
- ◆ More Efficient, Save Time and Money
- ◆ HIPAA-Enhanced Security Model!

## Visual Scheduler

- ◆ The Visual Scheduler allows easy drag and drop rescheduling of appointments.
- ◆ Easily change length of appointment with one click
- ◆ View up to 10 providers or resources at one time.
- ◆ User-Definable color coded Appointment Types
- ◆ User-Definable Appointment Lengths based on Appointment Types
- ◆ Fully customizable views allow the user to view all appointments or just appointments for a specified provider, resource, site, appointment type or any combination..
- ◆ Multi-Site scheduling simplified by customizable views allowing users to see all appointments for all sites or for each site individually.
- ◆ No-show / Late report allows the practice to easily identify missed and late appointments.
- ◆ Ability to print superbills for all scheduled appointments or individually.
- ◆ Search for next available appointment by provider, resource, appointment type, or site and specific length of time.
- ◆ Enhanced Security Model - This feature allows the practice to tailor security requirements throughout the system to determine exactly which user can access any part of the system. Not only can the practice customize which security level is required to access functions, but even restrict access to a customized list of users.
